GEOKOSMOS PARTICIPATED IN INTERGEO 2005

Geokosmos participated in the largest annual conference and trade fair world-wide for Geodesy, Geoinformatics and Land Management INTERGEO 2005 which was held in Dusseldorf, 4-6 October, 2005. The Conference slogan "Crossing the boundaries" reflected in the best way the importance of the event and its international status. This year the record number of exhibitors (515 companies) from 24 countries introduced geodetic surveying instruments, surveying accessories and supplies, hardware and software for Photogrammetry and Cartography, Remote Sensing software, Terrestrial Laser Scanning, Airborne Laser Scanning, GIS-software, Location Based Services, Internet GIS and Enquiry Systems. There is no doubt that a lot of INTERGEO 2005 participants are the leaders in the field of Geodesy, Geoinformatics and Land Management who set the development trends in the above-mentioned areas.

Among hundreds of exhibitors participating in INTERGEO 2005 *Geokosmos* has been for many years the only company representing the Russian achievements in the field of Digital Geodesy. *Geokosmos'* exhibition stand attracted many visitors. Within the framework of the event *Geokosmos* senior management team conducted important negotiations with the company's long-term partners such as Donald Carswell, *Optech Inc.* President, Johannes Riegl, *RIEGL LMS GmbH* President, Edward and Lorain Read, *Ohmex Instrumentation*, Bryn Fosburgh, *Trimble* Vice-president. Milan Konecny, President of the International Cartographic Association and Peter Aschenberner, President of the German Cartographic Society visited *Geokosmos'* stand as well and carried out negotiations with Sergey Melnikov, *Geokosmos* President.

About Geokosmos

Geokosmos is a leading company in Geoinformatics Industry in Russia and CIS, which offers comprehensive technology for aerial, terrestrial and bathymetric laser scanning surveys. The company provides digital elevation models, digital plans and maps, 3-D models of engineering objects and structures. Founded in 1993 and headquartered in Moscow, *Geokosmos* has obtained worldwide recognition and operates in the global market: in America, Europe, Middle East, Japan, and Africa. The company has more than 180 highly qualified and motivated employees. *Geokosmos* owns the state-of-the-art equipment and provides in-house developed software products for post - processing of collected data. *Geokosmos* official web sites: www.geokosmos.com, www.geokosmos.ru
