

PRESS RELEASE

30.09.2005

GEOKOSMOS TO PARTICIPATE IN INTERGEO 2005

The largest annual conference and trade fair world-wide for Geodesy, Geoinformation and Land Management INTERGEO 2005 will be held in Dusseldorf, 4-6 October, 2005. The aim of INTERGEO 2005 is to highlight new technologies and ideas in Geodesy, Geoinformation, Photogrammetry, Cartography, Remote Sensing that industries use in their everyday decisions.

650 leading companies representing 29 countries will participate in INTERGEO 2005. The participants will introduce geodetical surveying instruments, surveying accessories and supplies, hardware and software for Photogrammetry and for Cartography, Remote Sensing software, Terrestrial Laser Scanning, Airborne Laser Scanning, GIS-software, Location Based Services, Internet GIS and Enquiry Systems.

INTERGEO is an important event in the world Geoinformatics community and Geokosmos has participated in this conference and trade fair several times already. Geokosmos specialists use a one-on-one approach to presenting the company's activities, the scope of services and projects. During the event the company experts meet their partners and colleagues and use a unique opportunity which INTERGEO provides – to share knowledge and creative ideas with all those who are interested in Geoinformatics.

About Geokosmos

Geokosmos is a leading company in Russia and CIS, which offers comprehensive technology of three-dimensional aerial, terrestrial and underwater laser scanning surveys. Founded in 1993 Geokosmos has obtained worldwide recognition and is working in the global market through its own representation offices abroad in Western Europe and Middle East. The company owns the state-of-the-art equipment and offers its own software products for integrated processing of data resulting from traditional survey, aerial and terrestrial laser location.
